#### **EDUCATION**

• Bachelor of Engineering in Information Technology

Chaitanya Bharathi Institute of Technology, Gandipet, Hyderabad

• Board of Intermediate Education, Telangana

Narayana Junior College

2021-2025

**CGPA - 8.15** 

2019-2021

Percentage: 96%

## **SKILLS**

· Programming Languages: Python, JavaScript

Web Development: MongoDB, Express.js, React, Node.js

Frameworks/Libraries: TensorFlow, Pandas, NumPy

Tools: Git, Postman, VS Code

# **EXPERIENCE**

# **Brain-O-vision - AWS Cloud Computing Intern**

- Gained proficiency in AWS cloud architecture through a comprehensive course, enhancing skills in server management and cloud optimization.
- Led the deployment of **web applications** on the **AWS cloud platform**, increasing server efficiency by 40% and reducing latency issues.
- Acquired hands-on experience with various AWS services, including EC2, S3, Amazon Redshift, Glue, and Lambda.

#### **PROJECTS**

# Al Resume Screening System

- Built an Al-based system that analyzes and shortlists resumes based on job descriptions using NLP techniques.
- Used TF-IDF, cosine similarity, and SpaCy for keyword matching.
- Deployed with a Flask backend and basic UI.

## Disease Prediction Web App

- Developed a web app that predicts diseases based on user-input symptoms using trained ML models.
- Used decision trees and logistic regression with Scikit-learn.
- Deployed with Streamlit for user-friendly interaction

#### Expense Tracker Dashboard using MERN Stack

- Created a real-time expense management dashboard using React, Node.js, Express, and MongoDB.
- Features include secure login, budget visualization, and transaction history.

## **ACHIEVEMENTS**

Hacktober Hackathon : 11/2024
Developed an Al-powered Learning Management System.

Participated in, CSS cascade war
 O4/2022

Achieved top rank in competitive CSS challenges by developing multiple responsive landing pages.
